

# Accept a Dropbox Folder Share – When You have a Dropbox

## How to Accept a Dropbox Folder Share

Go to your emails and find the email from the person or organisation that sent you the share. Open the email.

Scroll down the email and look for the “Add to Dropbox” button. Click the button to accept the share.

This will then open your web browser and take you to your Dropbox login page. Type in your Dropbox password and then click on “Log in”.

Once you have logged in you will see the folder that has been shared with you. You can now go ahead and view or edit the folder and its contents depending on the permissions that the sharer has assigned to you.

If you are using the Dropbox desktop or mobile app you will now find the shared folder has been added to these also.
